MEWP SUPERVISOR TRAINING COURSE

www.ipaf.org

Operate legally and safely

IPAF's MEWP Supervisor course is for personnel who monitor and supervise the performance of operators' use of Mobile Elevating Work Platforms (MEWPs).

Can be completed via eLearning or at an IPAF-approved training center.

eLearning – study at your convenience

IPAF's new generation learning tools take another step forward with immersive 360-degree videos.

ABOUT THE COURSE

Companies that use MEWPs must designate a person to monitor, supervise and evaluate operators on a regular basis to ensure their proficiency and these individuals must receive MEWP Supervisor training.

This course covers what supervisors need to know regarding the rules, regulations and standards that apply to MEWPs for their safe and effective use, including selecting the right equipment, compliance with manufacturers' operator manuals and mitigating all possible risks from potential hazards.

- ➔ Do you know your responsibilities as a MEWP supervisor?
- ➔ Have you selected the right machine for the job at hand?
- ➔ Are the people you authorized to operate MEWPs properly trained and familiarized?
- ➔ Have you identified potential hazards and taken preventive measures?

This training course will help you answer these questions and prepare you to safely and effectively supervise MEWP operations on site.

WHO SHOULD TAKE THIS COURSE?

Anyone responsible for overseeing site management of MEWPs. Examples include MEWP supervisors, employers, project managers, infrastructure managers, foremen. The requirement applies to industries and environments such as construction, facilities management, retail, industrial cleaning, farming, airports and arboriculture.

QUALIFICATION

This course covers what supervisors must know to ensure the safe use of MEWPs on site. The course concludes with a written test. Upon successful completion of the theory test, candidates will receive an IPAF certificate. N.B. This course is not operator training; no MEWPs/machines are included in this training course.

eLEARNING

For your convenience, the eLearning version of the IPAF MEWP Supervisor course enables candidates to undertake their training in sections and to pass the online course at a time, pace and place of their choice, on compatible PCs and tablet devices. Alternatively, instructor led training can be delivered by an IPAF approved instructor at an agreed time and location.

'Safe working at height is exponentially enhanced when management comprehensively understand the organizational, safety and legal implications of their decisions. The desire of management to work safely and within the regulations directly and positively affects the safety and health of their workforce. IPAF's MEWP Supervisor course is a critical component in the education of management in order to protect both employees' health and safety and company liability.'

Kevin O'Shea, Director Of Safety and Training, AGF ACCESS GROUP INC

'MEWP supervisors are required to ensure all aspects of MEWP safe-use

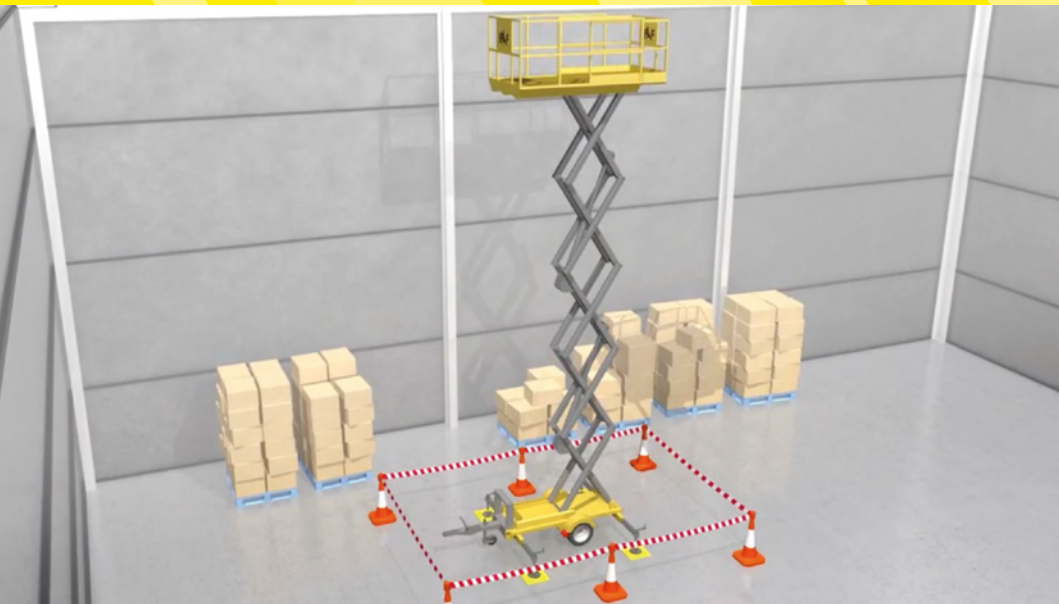

are in place by effectively monitoring, supervising and evaluating MEWP operators to ensure their proficiency. MEWP supervisor training is a requirement that assists persons in becoming qualified to perform these tasks and have a safe and productive workplace.'

Tony Groat, North America Regional Manager, IPAF
